## Domestic Pricing Fact Sheet – Queensland

This fact sheet estimates the cost of your electricity over one year. Your expected annual usage can be estimated by checking your latest bill for your average daily consumption and multiplying that by 365. These costs reflect charges for various levels of general consumption and for hot water (controlled load).

Estimated Spend calculations are based on the Queensland regulated tariffs effective from July 1<sup>st</sup> 2010, which are subject to change.

Any agreed discounts are excluded from these calculations. These will be applied automatically to your account once the conditions on which the discount is based are established.

Our offer does not attract any account establishment fees, however an exit fees apply if you disconnect your Sanctuary Energy electricity supply within the agreed contract period.

Please see your contract terms and conditions for further details.

### *Tariff 11 – Domestic*

Annual Usage	Estimated Spend
2 MWh (2000kWh)	\$525.62
5 MWh (5000kWh)	\$1,166.15
8.5 MWh (8500kWh)	\$1,913.44

### *Tariff 31 – Controlled Load*

Annual Usage	Estimated Spend
1.5 MWh (1500kWh)	\$130.68

### *Tariff 33 – Controlled Load*

Annual Usage	Estimated Spend
1.5 MWh (1500kWh)	\$192.39

Prices noted in this price fact sheet are correct at time of printing and indicative only. All estimations include GST. Ambulance levy payments and government electricity rebates, where applicable, are not included.
